## **NOTICE OF WORK**

### **13<sup>th</sup> AVENUE SANITARY SEWER SYPHON PROJECT**

#### **(Municipal Sanitary Sewer and Water Pipes)**

The District of Invermere has contracted Mackay Contracting Ltd (Cranbrook) to construct a new municipal sanitary sewer syphon line to help address capacity issues in the existing sanitary sewer system. The new sanitary sewer syphon line will be installed by directional drilling from 13<sup>th</sup> Avenue (between 5<sup>th</sup> Street and 2<sup>nd</sup> Street) down the embankment to connect with the wastewater treatment plant located on Industrial 2 Road

The project will also involve removing approximately 450 meters of paved road surface, followed by excavation, and replacement of sanitary sewer pipes, and connection with the existing residential sewer system.

Mackay Contracting will notify residents in advance of potential service interruptions.

It will be necessary at times to close sections or lanes of 13<sup>th</sup> Avenue and Industrial 2 Road to vehicle and pedestrian traffic to maintain safe conditions, as well as protect the public and workers at the job site. In addition, driveway access to some properties will be unavailable at times. When required, traffic will be diverted to other roads.

Please pay careful attention to directional signage / reader boards near the project site; those directions will be updated regularly. The District of Invermere and Mackay Contracting apologize in advance for any traffic delays and disruptions this important work may impose on the public.

If you have any questions or concerns about the project, please contact the District of Invermere by phone 250-342-9281 or by email [info@invermere.net](mailto:info@invermere.net)
