

Boat Launch Notice

Due to low water levels, resulting in an increased risk of damage to a boat or trailer, the concrete boat launch near Pete's Marina is currently closed.

The District has placed a set of barriers in front of the concrete launch. We hope this is only for the short-term, and we anticipate removing the lock blocks once the water level in the river channel rises.

Boaters will still be able to launch and remove their boats by using the gravel sections of the boat launch.
